Rack Tag

Model: Rack Tag

1. Introduction

The elongated RFID rack tag is specifically designed for applications in equipment, server cabinets, and pipeline management systems. Its slim and sleek form factor allows for easy attachment to the surfaces of cabinets or equipment drawers. Moreover, it can be securely affixed to metal pipes or cables using cable ties. Leveraging this cutting-edge transponder, the RFID tracking system can be seamlessly integrated into industries encompassing IT, finance, and manufacturing, among others.

2. Available IC

Impinj R6-P, others upon request

3. Data Sheet

Item	Specification
Operating Frequency	860MHz-960MHz
Material	PC
Storage Temperature	-25ºC to +85ºC
Operating Temperature	-25ºC to +85ºC
International Protection	IP68
Operating Distance	Depends on reader design
Dimension	55 (L) x 16.5 (W) x 4.5 (T) mm
Options	Laser Marking
